About This Game

Blockwick is a jumbled world full of colorful blocks. Connect all same-colored blocks on the board. Blue with blue, red with red, and so on. Don't worry about the white crates though—they just get in the way.

If you get stuck on a puzzle, don't fret. Just look for the hidden moon pearl. Finding the moon pearl in a puzzle will allow you to open the next puzzle.

The further you progress the more special blocks you'll meet. Some are bolted down and are permanently stuck. Some blocks are asleep and can't move until they're woken up (set down a same-colored block next to it to wake it up). Entangled blocks are connected together by quantum forces—when one moves so do the others. Blocks that are entangled share the same symbol.

Eventually you'll meet even more devious blocks. Sticky blocks are gooey and will stick to other blocks. You can't pick them up directly; they can only be pushed and pulled around with other blocks and crates. Caterpillar blocks are linked to each other like a train; they can only be moved with the head or the tail. Hypno blocks don't need to be connected to solve a puzzle, but they'll cause a lot of pain. The hypno puts any colored block to sleep if you set one down right next to it. Finally, flip blocks have six sides. When you move them, they flip to a different side, exposing a new color.

Oh, did you notice the strange glyphs on the ground? Each puzzle has three. Try to cover them all up with groups of linked blocks to master the puzzle. It'll be more tricky, but it's good for your brain.

That's about it. Have fun!

The game is really good, I would recommend it. It's more for puzzle professionals than beginners. What I personally do not like is that it has too many levels. I do not have all the levels through but if I'm right it should be 304 of which more than the half are really tricky.. Blockwick 2 has a lot to offer. There are quite a few puzzles, and as you get further and further in, they get harder and harder. Plus, each level has challenges: find the pearl (easy) and illumination (hard), which will keep you scratching your head as you try to solve each one. At this time, I've not completed every puzzle, though I'm close, and I've already spent 20+ hours in the game!

If you like puzzles, for the price you pay, this is a great deal!. A pretty good basic puzzle game.

Puzzles are well made, sometimes quite hard if you try to *fully* solve (AKA illuminate) them.

The graphics are simple but clean. Nothing spectacular.

The interface feels like it's designed for mobile, but that didn't cause any problems.

It feels fairly polished, the only bug I found was a fullscreen Linux issue which is fixed in the beta.

IMHO, given it's price, 79%.

. Just finished the first chapter and i must say i really enjoyed playing it!

I was playing it with an xbox360 controller and i felt so comfortable with it while moving those blocks around.

-> may add official controller support (; ?

overall 8/10 would recommend it to my puzzle amused friends.

Best Regards

Kyusung. I got this game for less than \$1 on sale. The gameplay value is immediate and very fun. Probably one of the best dollars I've ever spent on a game. It's beautifully designed, with a nice tranquil soundtrack to go with the gameplay. Great buy, great developers and immediate value for the money.. A great puzzle game about sliding block in tight spots to group by color.

Where the old Klotski could get repetitive, Blockwick never repeats the same configuration and introduces special blocks to keep things interesting.

Each level has the chance of being solved or illuminated. Even if a level is hard, you can move to the next level if you find a hidden pearl. If you find a hard level you can at least move on and come back later.

The set of Basic levels added after the initial release is easier than the normal levels but they are still some extra fun.

Very recommended if you're the thinker type.

Small cons:

* Undo is limited to one movement. After that there's only the option to restart the level. And even then, this is not too bad since when you're stuck, trying a new fresh solution can be the best idea.

* Music is pleasant but the tracks are short and it will get repetitive. Easy to silence, of course.

As far as near mindless yet satisfying mouse-clicking goes - this game has it on point. A great break from the mind-numbing nature of editing my paper or having a conversation with my wife. Highly recco dis goon'nes. Lastly, a shout-out to any reviewers who have more time logged into this game than me. You all the real MVPs.. Great puzzle game for relax. Blockwick is an excellent, challenging, relaxing puzzle game. It encourages a sense of "flow" better than many games. I really enjoy that it worked on my Thinkpad w510 touchscreen laptop in Linux. Kudos to the devs on that.. This game is quite simple to learn but hard to master. I have greatly enjoyed this game, but it is quite mentally taxing in later levels. Still, there is a fairly simple mechanic which for a little extra effort allows you to skip too difficult levels, which you can go back to at your leisure.. Everything has been said already. Buy it.. The game is really good, I would recommend it. It's more for puzzle professionals than beginners. What I personally do not like is that it has too many levels. I do not have all the levels through but if I'm right it should be 304 of which more than the half are really tricky.. I just love the concept and the fact you can complete a puzzle, complete it "in the right way" and find pearls / secrets within each round!. EARLY REVIEW

About 40/300 Puzzles Done

A very cool relaxing puzzle game about connecting like colored blocks. Ramps up in difficulty, but never is totally (so far) insurmountable.
